**Do you ever have
Those thoughts,
While browsing
Among the ferns
“If one utahraptor
Eats another
utahraptor, how many
Were there
to begin with?**

**And if
The answer is two,
does this generalize,
to the case in which
a deinonychus
eats another
deinonychus?**

**Ever have those thoughts?
I sure do.
It drives me crazy.
Good thing
eating makes sense.**
